

## PHOTOELECTRIC SMOKE SENSOR

Model ALG-E is a Photoelectric Smoke Sensor, which is fully compatible with Hochiki's ESP Analogue Addressable Protocol. The ALG-E is also available in black, which makes it ideal for nightclubs and cinemas where attention to aesthetics is required:

The ALG-E incorporates Hochiki's unique High Performance Technology removing the need to use Ionisation Smoke Sensors in the majority of applications and this also allows the sensor threshold level to be increased, thereby improving the signal to noise ratio and reducing susceptibility to false alarms.

The ALG-E smoke chamber is easily removed or replaced for cleaning and utilises a unique baffle design which allows smoke to enter the chamber whilst keeping out ambient light.

- ▶ Removable, High Performance chamber
- ▶ Twin fire LED's allow 360° viewing
- ▶ Locking mechanism (sensor to base)
- ▶ Variable sensitivity
- ▶ Electronically addressed
- ▶ Non-pulsing version available (ALG-E(NP))
- ▶ Approved by LPCB & VdS
